The SOW looks OK to me... there is one or two very small typos... nothing to worry about...

So the IWGE is basically showing \$ 46,000 for 4 days of flying and ground... that sounds reasonable... all the way back to Katrina, I had been told to budget for around \$10K / day for mission assignments, so this seems OK...

With Regards, Steve

Adam and Kellon,
See the attached files for the SOW and IGCE for the ASPECT deployment to Deer Park for the ITC tank fires. This is based on four days of flights including last night. If you think this will go longer give me a call and we can discuss how to modify the IGCE appropriately.

That works just fine Adam. It will be in the ball park and I will go with that.

Mgmt is asking to plan for utilizing the aspect mid day Today thru wed. So, a total of four events. As the incident is progressing, I don't foresee cutting that short, but then it could happen.

Apologies for not having a more firm estimate.
Adam

Gentlemen,
I do not currently have an estimate of the ASPECT deployment costs for this latest response. I thought we were done yesterday and it would have been pretty easy. The discussion now is for a longer term monitoring mission. If someone would give me a ball park estimate of the number of days the service is needed I will pull something together to help get the PR ball rolling.
